## Mind-Blowing Temperature Fraud At NOAA

Posted on [July 27, 2015](#)

The measured US temperature data from USHCN shows that the US is on a long-term cooling trend. But the reported temperatures from NOAA show a strong warming trend.

They accomplish this through a spectacular hockey stick of data tampering, which corrupts the US temperature trend by almost two degrees.

## USHCN US Temperature Data Tampering Final Minus Raw

The biggest component of this fraud is making up data. Almost half of all reported US temperature data is now fake. They fill in missing rural data with urban data to create the appearance of non-existent US warming.

## Percentage Of USHCN Final Data Which Is Fake

The depths of this fraud is breathtaking, but completely consistent with the fraudulent profession which has become known as "climate science"

## DIFFERENCE BETWEEN RAW AND FINAL USHCN DATA SETS

**Realist** says:

I really don't understand how this can keep happening. In my job, I have to provide monthly reports to my superiors. Without having a degree in math or statistics, I can easily use excel to 'adjust' the numbers to create any trend I want. On paper, the numbers still add up, but I can splice and dice, and use smoke and mirrors, to create a desired trend. So I could easily go in month after month and show all positive trends, but eventually the divergence between what I say (surface temps) and what the finance dept says (reality) will become so great that I will be called out, investigated, then fired, and not necessarily in that order. Besides the fact that this would ruin my career any any future job opportunity, its morally and ethically wrong to lie about what the data says. How people can keep getting away with this is just crazy.

Realist ; I'm also angered by the unfettered way the warming mongers nonsense & obvious fraud is broadly accepted. Most organisations have systematic processes that eventually exposes corruption. In a mainstream democratic society, an important safeguard is having a Press that if free of bias & prejudice.

...

What is key to the continuing Global Warming Fraud is that a myriad of watch dogs are effectively in the pockets of the fraudsters. Above all, the Media, the one area of open review has failed Society with many even driving the Global Warming mantra.

There is, indeed, a stunning lack of curiosity among the media elites on this subject. Contrary to what their mind is subjected to, on a daily basis, they allow themselves to be corrupted by those who say things they can not prove.

Regretfully, without the release of Climategate emails in late November **2009**, most of us would never have realized that Stalin won WWII and united nations (UN) and national academies of sciences (NAS) into a worldwide "*Orwellian Ministry of Consensus Science (UN)Truths*" on **24 October 1945**.

Yes, fraud became the main component of consensus science after Stalin won WWII and united nations (UN) and national academies of science (NAS) into a giant worldwide “*Orwellian Ministry of Consensus Science (UN)Truths*” that immediately changed the internal composition of the Sun from:

- \_ a) **Mostly iron (Fe) in 1945** to
- \_ b.) **Mostly hydrogen (H) in 1946**

Followed by the **FRAUDULENT:**

- 1. Standard solar model**

<http://www.washingtonpost.com/news/energy-environment/wp/2015/07/27/climate-change-skeptics-may-be-about-to-lose-one-of-their-favorite-arguments/>

I really loved this Hansen quote: *“It will be clearer, give us a few more years,” he says.*

However the quotation that burned-out my Bovine Excrement meter (miniature mushroom cloud) was the rave review from “Atmospheric Chemistry and Physics Discussions”: *“masterwork of scholarly synthesis, **modeling virtuosity**, and insight, with profound implications.”* (Note the utter and complete absence of any mention of teeny words like “accurate”, “reliable”, or heaven forbid, “factual”)

Yep, a masterpiece of “modeling virtuosity” aka a computer-generated fantasy climate model. Or as I prefer to call them: fact-free and reality free simulations for big cash / massive grants. Paris is coming, and my Bovine Excrement meter is already a smoking ruin.

We are witnessing the first events in the global apocalypse to come. I know there will be cheap shot artists following the PC model and making fun of what I say. They don't seem to realize they are as much a part of the problem as the climate change “sky is falling” crowd. There is a giant movement that is gaining momentum every day. We get in bed with the worst of the worst in Iran and demand that our people hand over their money to countries that are the “victims” of climate change. It's always easy to buy power with other people's money. The end use of the power being gathered will shock the world. In short, we haven't seen anything yet. Go ahead and stick your head in the sand and say it can't happen here but then take a look at how it did go that way in a highly civilized country, Germany not to mention Japan, Russia, China, North Korea, Rwanda, Cambodia, Cuba, etc. etc. And countries like the UK are right on the brink of becoming total fascist states. And that is the goal of the power grabbers who make scape goats of anyone that doesn't join the party and shout “Heil Climate Change” along with other fascist slogans. If you live much longer you will see the worst era in the history of man. The time of the return of Christ is at hand. But I'm guessing that 90% of the people here who act like they have some sense will falter at these words in spite of massive evidence. The Anti-Christ is gathering power and if you fight against Christ you are serving the dark side period. Don't think it won't happen. The plans our “leaders” have for us are staggering and they are just the tip of the iceberg. Evil is real and it's coming to your town.

Worse yet..."urban" temps are where congestion (and therefore TEMPERATURE) have increased. It's all a fraud when you increase the items that are absorbing and / on retaining heat. For example, if I have an open yard, then line the yard with a brick fence, the temps will rise, heat will be retained and therefore start the next day higher and give the appearance of an increase.

The one salient point in this fraud is simply this. Governments are creating laws around this garbage and innocent people are being harmed by those laws. "The ends justifies the means" mentality is on display.

What I want is justice. People harmed by these laws should be restored and those behind this scheme should be spending the rest of their lives in prison without parole. That includes both alleged scientists and politicians.

NOAA and NASA are both government agencies. The government wants proof of global warming, so they change the data to fit the request. The climate scientists live by government grants. If they disagree with global warming, they don't get their grants. That makes it possible for politicians to point to global warming, backed up by science. Science that's intentionally skewed by corrupt data isn't science at all. It's all driven by a political agenda, and it will also make Al Gore, and others like him very rich. Volcanic eruptions can easily cause more climate change than man and his machines. Will they outlaw volcanos too?
